How Does ONE Missing Assignment Affect Your Grade?

	Points		Grade
Assignment 1	90	=	A
Assignment 2	92	=	A
Assignment 3	95	=	A
Assignment 4	100	=	A
Assignment 5	80	=	B
Assignment 6	95	=	A
TOTAL	552	=	A average

$$552/6 = 92$$
$$92 = A$$

Assignment 7	0	=	**MISSING**
TOTAL	552	=	C average

$$552/7 = 78$$
$$78 = C$$

Assignment 8	90	=	A
Assignment 9	95	=	A
Assignment 10	90	=	A
TOTAL	827	=	B
			Low B average

$$827/10 = 82$$
$$82 = B$$

This student had 10 assignments.
    8 were "A"   1 was "B"

One _missing assignment_ was a ZERO.

THE FINAL GRADE WILL BE A LOW "B".
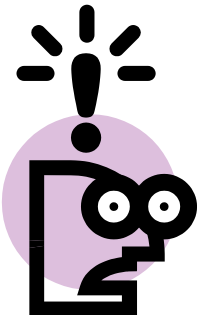

And all
            because of
                        one missing assignment!

What is the moral of this story?
